RCM Technologies secures its presence in Bruce County to support Bruce Power's Life-Extension Program

RCM Technologies plans to locate a substantial design, procurement and project controls capability at its Kincardine location, in Bruce County. The increased need for office space will see RCM Technologies expand its presence on the second floor of Kincardine's Municipal Administration Centre building, using a total of 4,000 sq. ft.

"We are pleased to see RCM Technologies expanding its presence in our region and establishing such a significant footprint," said Mitch Twolan, Warden of the County of Bruce. "Their investment in our economy is a great win for the entire region."

In addition to design and field support services, RCM is relocating and hiring office staff and senior management personnel at this location, with plans to increase its current local staff to about 80 people who execute most of their work for Bruce Power.

"We are extremely pleased to announce this expansion," said Rocco Campanelli, Chairman and CEO of RCM "We have been a partner with Bruce Power since its inception in 2001, working on numerous capital and Operations and Maintenance projects. Expanding our local presence will enhance the efficiency and cost-effectiveness of delivering our services, while improving the local economy through job creation and increased spending in Bruce County."

"This is a fantastic win for our regional economy," said James Scongack, VP of Corporate Affairs at Bruce Power. "RCM Technologies will bring highly skilled, value-added jobs, supporting our vision of a long-term, sustainable regional economy that is able to facilitate and move forward innovation in the nuclear industry."

About RCM Technologies

About the Economic Development and Innovation Initiative

In 2016, Bruce Power and the County of Bruce launched a regional economic development initiative to facilitate the expansion of Bruce Power Suppliers into the region. This initiative was in response to Bruce Power's multi-billion dollar, multi-year Life Extension Program. More information on the initiative can be found at www.brucepower.com/suppliers.

About Bruce Power

Formed in 2001, Bruce Power is an electricity company based in Bruce County, Ontario. We are powered by our people. Our 4,200 employees are the foundation of our accomplishments and are proud of the role they play in safely delivering clean, reliable, low-cost nuclear power to families and businesses across the province. Bruce Power has worked hard to build strong roots in Ontario and is committed to protecting the environment and supporting the communities in which we live.
