

Here is a list of supporting documents and information often required for submission of a Technical Dossier to the TSSA. Please provide us with the applicable information to the best extent you have available. The greater amount of the information supplied will reduce the complexity and uncertainty in the submission and approval process.

- Ride information: device name, manufacturer, serial number, year of manufacturing, permanent or portable device.
- Drawings/sketches: ride dimensions, general arrangement, site layout.
- Manuals: operations, maintenance, set-up/tear-down....,etc.
- Electrical wiring diagram.
- Control system schematics.
- Hydraulic and pneumatic schematics.
- Photographs: the ride, the passenger carrying unit and passenger restraining/containing device close-up.
- Manufacturer's bulletins received.
- Stress analysis report
- Welding standards and welders certifications.
- Foundation information (for permanent rides)
